

TREFTZ WHERE MUSCLE *STILL* MATTERS

ANNUAL PRODUCTION SALE

FEBRUARY 12, 2022 • 1 P.M.

at the ranch in Wetonka, South Dakota

SALE INFORMATION

VIEW AND BID ONLINE:

..... www.dvauction.com

SUPPLEMENT INFORMATION:

• Yearling Weights, Scrotal Measurements and Ultrasound data will be available sale day and online at www.treftzlimousin.com.

TRUCKING AND BOARDING:

- Free boarding on yearling bulls until fertility tested—generally by April 1, 2022. A charge of \$2.50 per day after that. Boarding no longer than May 1, 2022.
- Fall and two-year-old bulls picked up or delivered by March 1, 2022. A charge of \$2.50 per day after that. \$50 off on these bulls picked up sale day. Boarding no longer than May 1, 2022.
- Free delivery up to 250 miles on bulls.
- Bred heifers and open heifers to be taken home sale day or shortly after.

PURCHASER OBLIGATION:

- All animals are at risk of the purchaser once sale is made.
- Border fees out of the U.S. is the responsibility of buyer.

HEALTH AND PAPERWORK:

- Vaccinations—(Spring) Vira-Shield 6 with Somnus, Pasteurella Presponse, Ultrabac 7; (Fall) Covexin 8, Inforce 3, Presponse. Booster-Vira-Shield 6+Somnus, Oral Wormer, Cylence and Cleanup Pour On
- Health papers and brand release furnished where required.
- Registration papers transferred to new owner.

VIEWING, CATALOG AND VIDEOS:

- Catalog and videos of bulls can be viewed online at www.treftzlimousin.com, www.mcmarketingmanagement.com or www.dvauction.com
- Buyers are encouraged to view the cattle any time prior to sale date in case of inclement weather sale day.

All cattle sell under the standard terms and conditions of the North American Limousin Foundation.

SELLING 18 OPEN FEMALES

Dear Friends and Cattlemen,

Welcome to our 12th Annual Production Sale.

With another drought in 2022, we sold more than 100 females to accommodate for our loss of hay production. We went beyond regular culling practices and sold TREF genetics to add to many other up and starting programs. We wish them the best of luck with their purchases!

As a small breeder, our success must come by differentiating our product from others. We need to develop a product we truly believe will enhance your operation. We feel by using our purebred bulls on your English based cows, you will see the most hybrid vigor than at any point of the crossbreeding plane. The more diverse the genetics between the two breeds of cattle, the more bang you will receive from the cross. We've done it here on our own F1 baldie herd and it works.

We have never skimped on genetics (bulls) when trying to improve our cow herd. We are constantly on the lookout for outcross genetics with plenty of performance and power to use in our program. We feel that will be evident on February 12 as your browse through our sale pens. A group of fullblood cows were added this past fall that we will mate with some of our purebred bulls to further offer outcross genetics for our customers. Our embryo transplant program continues to grow as well. New things equal exciting things.

For almost 40 years, disposition, milk, fertility, fleshing ability and most importantly, muscle, are traits we've selected for in our cattle. Fat can be fed on, muscle can't. Using Treftz Limousin bulls will produce those wide topped calves with expressive hindquarters that will make you proud on sale day. If you take them to the next level and background or finish, you will be impressed with the conversion and efficiency where Limousin is second-to-none! We don't show cattle; instead we try to produce females that will make functional brood cows that are ready to go to work. The open heifers in the sale are destined for that goal.

We do the calving, feeding, clipping, picturing and videoing, so we KNOW these bulls and heifers! If there are any details, no matter how small you want to ask, don't hesitate to call prior to the sale. Since our 2021 sale, we have concreted our sale barn and added heat and a bathroom. So, if we have one of those usual brutal winter sale days, at least we will all be in comfort. If you do decide to buy sight unseen, rest assured, your purchase is guaranteed to your liking or you don't own it.

We highly recommend you insure your purchase on sale day as we all know the predicaments cattle can get into. Policies will be available sale day through Grassroots Insurance or most private insurance companies can insure them as well. We would like the open heifers, two year old bulls and fall bulls picked up sale day or shortly thereafter. If this doesn't work for you, please let us know sale day. A veterinarian will be available sale day to assist with health papers for those loading up sale day.

Hope to see you February 12!

Sincerely,

Glenn, Lori, Dustin, Courtney, Reece and Cooper

ABOUT THE CATTLE

The 18-month-old and two-year-old bulls are virgin bulls and are being offered for the first time. We try to carry over bulls as two-year-olds if they are born later in the spring. They have been on a grain ration of corn/dry distillers at a ratio of .075% of body weight and free choice chopped prairie/millet/alfalfa hay. They have been free roaming on a small pasture to keep them in optimal breeding condition.

The yearling bulls have had a similar diet of corn/dry distillers at less than 1% of body weight and the same free choice chopped hay. CTC medicated pellets are fed for five days every 45 days to keep the bulls healthy. They were weaned and put back on pasture until December 20. No silage is used in any of the bull rations.

The bulls will be fertility tested and will have been vaccinated with Bovi-shield Gold FP5/VL5, anthrax and twice for pinkeye and foot rot prevention prior to delivery. The older bulls will be trich tested for states where needed. All our cattle are on a complete Purina mineral program year around. Please let us know prior to delivery if there are required vaccinations for your area of the country that are important to you. We also pour the bulls monthly with different products to keep in ahead of lice and rubbing issues. Several of the top end bulls have been tested for the F94L Myostatin gene and the results are added in the footnotes.

Many of the bulls have been tested for the Homo polled and Homo black genes with the results listed on the pedigree of each bull.

We will keep the yearling bulls free of charge until April 1. After a satisfactory fertility exam, we will deliver the bulls with no cost to you up to 250 miles. Beyond that, we will work with you in getting your bulls delivered to an agreed upon central point. Please bring your trailer if you are thinking about purchasing a two-year-old bull, fall bull or open heifers as we would like to move them as soon as possible right after the sale. We will deduct \$50 for each bull taken home sale day. A veterinarian will be on hand to issue health papers where needed.

A supplement sheet will be available online and sale day with adjusted yearling weights, scrotal measurements, and ultrasound data. Be sure to go to our website www.treftzlimousin.com or www.dvauction.com for updated pictures, videos and other data.

Again this year, we are including a calving-ease score based on a combination of pedigree, EPDs, and calving history from sire and dam.

E - Recommended for cows only

EE - Should work on cows or heifers

EEE - A good choice for breeding heifers

Treftz Limousin—"Where Muscle Still Matters"

Did you know...

Sometimes you reap a benefit without even knowing. Did you know Limousin cattle have a distinct gene called myostatin found in all fullblood Limousin cattle and likely in many purebreds with muscle expression? The myostatin gene is responsible for muscling and tenderness, yes, TENDERNESS in our beef. Studies performed indicate an improvement of up to 19% of the Primal Cuts of a beef carcass carrying two copies of the myostatin variant F94L. The data also cites better feed conversion rates.

In our program, we use the F94L as a tool for our breeding

program. Over the years, we've tested several bulls and all have carried both copies. We feel confident

this gene is inherent in our herd. As you will note, some of our top lots will carry the test result for the myostatin.

How should you use the data?

If you want feeder calves that have increased thickness then you'll want to select genetics carrying two copies of the F94L, especially if your cow herd is British based.

More For Less THE LIMOUSIN ADVANTAGE

In a time where prices for our cattle are struggling to stay above input costs, feed conversion and cattle that perform will always improve the bottom line. Over the last 35 years in the Limousin business, one of our main focuses is on performance with as little feed input as possible. Our efforts have paid off.

In 2016, we were asked by our local Purina Company to participate in a feed trial using a product called Accuration Starter CP HL (in a pellet) fed free choice on our weaning bull calves. Already knowing Limousin is a very feed efficient breed, we were shocked with the results at the end of the 27 day trial.

Below are the results of 520 trials Purina conducted with several different breeds and Treftz Limousin on the bottom row. See the difference quality Limousin cattle will produce!

520 Proofs	Start Weight 499	End Weight 575	Days on Feed 22	ADG 3.47	Feed Conversion 4.79 to 1	Accuration Intake/Day 15.11 lbs.	Grain % of Body Wt. 2.86%
Treftz Proof	Start Weight 692	End Weight 821	Days on Feed 27	ADG 4.79	Feed Conversion 3.81 to 1	Accuration Intake/Day 11.02 lbs.	Grain % of Body Wt. 1.46%

What an exceptional way to lead off this impressive offering! TREF **GE-EPDS** Jokers Wild 1600J combines a notable pedigree, a balanced EPD profile, and eye catching phenotype. He is sired by the proven RPY Paynes Diesel 37D, the popular COLE Architect 08A son that transmits a stout muscle pattern to his progeny. His dam is our tried and true donor female TREF Yakira 766Y. Study the first five lead lots and see just how consistent she makes her offspring. This herd sire prospect exemplifies all the traits we strive for in one package: massive muscle shape, soundness, easy fleshing, big ribeye, and docile. Plus, he is homozygous polled, with big time performance! He backs it up with his outstanding genomically-enhanced EPDs. We think this bull and his flushmates fit the call of many cattle operations and challenge you to find other red, purebred bulls of his caliber anywhere in the land.

Lot 3 has been a stand out all summer and continues to impress us with his muscle expression. Don't miss one of the last chances to get a herd bull from one of the most prolific cows to walk our pastures, the now deceased TREF Yakira. Yakira's sons have averaged \$10,000 in our sales. This mating to Paynes Diesel hit it out of the park. These five herd changing prospects have the pedigree, power and super quiet dispositions to take your program to the next level.

These full brothers are flat impressive. We challenge you to find a flush of red purebred Limousin bulls of deeper quality and consistency. Our sale last year was also led by three full sib flush brothers to this year's five lead lots. Consistency is one of the most important attributes to a successful breeding program, as evidence by this powerful bloodline. Study this herd sire prospect beside his flush brothers. His dam is the now deceased, the Trefitz Limousin matriarch TREF Yakira 766Y. Study his genomically-enhanced EPDs and find weaning weight and yearling weight figures that rank in the top of the Limousin breed. Add predictable growth and muscle to your next calf crop. **CALVING EASE: E**

One of your last chances to procure a son from the now deceased TREF Yakira 766Y. She is no stranger to our sales with her sons generally selling as Lot 1. In 2019, her first heifer calf went to TaDomi Hunt of Ontario, Canada, as the pick of the heifer crop. This is your chance to be the judge as we proudly offer these five exceptionally designed full brothers. Mating this female to the proven RPY Paynes Diesel 37D, the popular COLE Architect 08A son, was one of the best decisions we have ever made. On paper he ranks in the top 10% for both weaning weight and yearling weight. Bid with confidence. **CALVING EASE: E**

Turn your attention to this herd sire prospect that comes with a birth weight EPD that ranks in the top 30% of the breed. TREF Joker 707J has an alluring phenotype, is stout featured and wide based, with added growth, performance and extra capacity. His sire, Wulfs Fiat K683F made the Wulf Cattle high seller list when we bought him for \$10,500 in 2019. His dam is the highly productive donor, TREF Yesterday 707Y, a SYES User Friendly 524U daughter. This polled, black hided herd sire is no joke.

A Full brother to Lot 10. This herd sire prospect is an absolute eye catcher. Smooth patterned, long bodied, wide based and is truly impressive when set into motion. We love how he combines heavy muscle with center capacity. His sire, TOMV Diesel 619D, is one of the best herd bulls we have ever used and will have a lasting impact on our cow herd. His donor dam, TREF Yesterday 707Y, has 13 progeny registered in NALF. What's more he is homozygous polled. TREF Jesse James 275J could be utilized in a variety of different programs.

This herd sire prospect is truly special! TREF Junk Yard Dog 177J has been a stand out since birth garnering a lot of attention from visitors and for good reason, he is an absolute eye catcher. If you like good footed, long bodied, deep sided, heavy muscled, functionally correct cattle that are homozygous polled, watch for this exceptional son of Wulfs Fiat K683F. We are impressed with Fiat's ability to add marbling without sacrificing muscle. His dam is one of the most productive females on the farm. TREF Cassie 177C knows how to make a great one. He has a well balanced set of EPDs, highlighted by a top 15% for WW, top 25% for YW, top 1% for MK, top 1% for TM, top 10% for DOC, top 10% for CW, top 45% for REA, top 10% for MB and top 5% for \$MTI.

This herd sire prospect will add performance, docility and carcass advantages to any herd he is applied to. He is stout featured and ruggedly designed. He is a son of TOMV Diesel 619D, making him a paternal brother to last years \$50,000 top-selling lot, TREF Hardcore 204H. His dam is a productive patterned Richmond Xander SRD 22X daughter. Phenotypically he is heavily structured, big bodied and level topped, with extra muscle expression. He is free moving off both ends of his skeleton. TREF Jagger 993J would be a great addition to your herd bull arsenal.

CALVING EASE: EE

Treftz Limousin— “Where Muscle Still Matters”

We understand most of our customers want to take as many pounds to the sale barn as possible. With that in mind, we make a concentrated effort to breed for pounds and performance. The key to producing those pounds is increased muscling. Our ultrasound results over the last seven years illustrate our selection pressure for muscling is paying dividends.

HETEROSIS AT WORK

The British-bred cow has earned her rightful spot on the range as one of the best. She maintains her condition, is fertile, has the right amount of milk, is a great momma, and is tough. We would be foolish to try to improve her. But, wouldn't an additional 50 to 100 lbs. of extra calf weight in the fall on that same cow with no extra input costs, be a bonus in today's tight profit margins? That can be accomplished by breeding her to a Purebred LIMOUSIN bull. An article in a beef breeding magazine once stated, "the more diversity between breeds of cattle, the more dramatic the outcome will be." We strongly believe in that philosophy and have strived since our program was conceived to produce that very kind.

This bull originates from the same cow family as the ET calves in the front of the sale. His dam was one of our very best. Another one of those bulls with Fiat on the top side ranking him in the top 1% for milk.
CALVING EASE: EE

Commitment and Quality. Two things that are a necessity in the cattle industry. Treftz Limousin amplifies both. Glenn's commitment to quality is reflected in every animal he raises and sells. Some things COST and some things PAY. Pay yourself by investing in Treftz's commitment to quality! Customer for life. None better!

Doug Henley
Britton, SD

After 45 years of using Limousin bulls, a lot of changes have happened. Treftz Limousin cattle have strong maternal traits complimented with Glenn's effort to add more performance, muscling and disposition to their bulls and heifers. Glenn has a herd to be proud of. Our purchases have filled a need for high percentages genetics to improve our cattle. He is friendly, honest and easy to do business with!

A very deep bodied bull who is a maternal brother to our Grand Slam bull that started our sale as Lot 1 in 2020 and sold to Schock Limousin. Top 4% for milk.

CALVING EASE: EE

I have been in the cattle business for 15 years. As a young cattle breeder, I enjoy discussing and learning new ways to my business. When I met Glenn 4 years ago, he was a seasoned breeder. He quickly went from a business associate to a mentor for me because of his willingness to guide me. As I grow my business, it doesn't matter if I have 10 cows or 100, Glenn is happy to field my questions from breeding to mineral programs which help me in my own business. He goes above and beyond by providing text and calls for updates on calves and cows. It is because of his trusted relationship that he builds with his customers that I have purchased cattle from him sight unseen. I know that it is to my convenience to do this; however it is my pleasure to pick them out in person to get a little more time to soak up some of Glenn's knowledge and advice since he is not afraid to share how he raises his animals. It is for all these reasons that I truly appreciate Glenn as a mentor, a business associate, and a confidant. He inspires me to be more like him in my business raising cattle, selling, and customer relations, but especially as a good person. Glenn, I am truly grateful to have crossed paths and continue to grow and learn from you.

OPEN YEARLING HEIFERS

OPEN YEARLING HEIFERS • LOTS 53A — 61B

Our replacement heifers get no creep feed and this year were weaned November 1. They were sorted off 2 months before the sale and given a little more grain than their contemporaries. We don't let our heifers get "addicted" to corn. They're expected to get the job done without much supplementation when they become cows. If you're in the game to produce the kind of bulls we've become known for, these are the type of TREF females that will take you to that level.

They've been paired to be evenly matched by pedigree, frame, and/or color. Selling choice or take them both.

As before, we will offer free semen on any bull in our battery to breed them.

Years of AI genetics behind this two hard to part with heifers. Lot 57A is out of the dam that raised our high selling bull in 2020, TREF Gunpowder. Lot 57B is stacked for calving-ease with Bentley, Easy Going, Stetson and User Friendly in her pedigree. She could raise you the next heifer safe deluxe bull! She was a dream to work with in the photo pen.

LIMOUSIN DOCILITY

The Limousin Breed was one of the first breeds in the continental United States to address docility and the temperament of cattle more than 25 years ago. NALF breeders began to record docility scores for cattle and utilize a docility EPD in their culling process and mating decisions in an effort to make dramatic improvement in their cattle. Since the initiation of the IGS BOLT EPD single-step cattle evaluation that allows breeders to compare EPD traits across various breeds, Limousin now ranks number 1 in docility among IGS cooperator breeds. This is positive testament that utilization of EPDs to make advancement in genetic traits in beef cattle can be successfully used to make genetic improvement in beef cattle on any trait when tools and technology are correctly applied to mating decisions.

Mark Anderson, NALF Executive Director

Feminine made heifers from cows that have been doing their expected job every year which leaves them a spot in the pasture. Very likely both are homo black.

TREF Hardcore 204H

TREF Hardcore 204H was a lifetime's achievement here at Treftz Limousin as he went on to be appraised at \$51,000 in our 2021 sale. A month after selling, he went to stud and collected over 2,200 units of semen for domestic and international use before returning home by mid June for the tail end of spring breeding. He has grown to a 2,000 lb. specimen at 22 months. Excitement north of the border was evident as our partners in Canada recently sold 100 units of that semen averaging \$235 per unit. We share ownership with our friends at Schock Limousin of Carson, ND. We very much appreciate the confidence in the several herd bulls they have purchased from us the last few years. We will be offering semen for sale on Hardcore for this spring's breeding. Stay tuned!

HETEROSIS AT WORK

In 2018, we sold a bull to a first-time buyer in the Sandhills of Nebraska. They run 100+ predominately Red Angus cows at one ranch with Red Angus bulls. He stumbled upon our program on DVAuction weeks prior to our sale inquiring about Limousin cattle. He was impressed with what he saw and wanted to try something different. His first comment was "You'll never sell a Limousin bull to anyone over 50 in the Sandhills" because of the issues with disposition, but he was willing to take a chance. After several conversations talking Limousin and making him feel comfortable, Tim purchased a high-selling bull at our sale.

Here is his testimony 18 months later:

"We DNA tested all of our herd bulls and when we weaned our calves we DNA tested what we thought were the best-looking calves and the biggest calves. When the tests came back, everyone of them was out of the Treftz bull! Also, when we were loading the calves on the semi, two of them came by the brand inspector and he said "I don't know which bull those two are out of but you better buy some more bulls from that guy."

Tim Wells, Nebraska Sandhills

REST IN PEACE

As I write this it is extremely difficult as the wound is still very deep. On January 1, our beloved cattle dog, Blue, crossed the rainbow bridge. When he became ill it was very unexpected. He was hospitalized for several days before the vet told us that we needed to make that difficult decision as there was nothing more they could do for him, he had advanced cancer. We were completely devastated, but knew what we had to do to end his suffering. He was a friend to everyone and especially loved kids. When anyone would drive into our yard he was there to greet them and hoped to get a petting. He was a people pleaser and loved the praise when working cattle. He was a great cattle dog and his happiest days were the days he got to help with the cattle, hop in the side-by-side and go for a ride, and hearing the tractor horn as he knew his help was needed and he was there in a second to lend a hand. We never heard him bark, but if he did, we knew there were cattle out in the yard. He always loved bull sale day. He loved to have so many people here at the farm and would love "working the crowd" looking to get petted. We all agree that Blue was one of a kind and there will never be another like him. He is greatly missed. He was loved so much and has definitely left a void in our hearts. He would have turned 9 this month and left us way too early. He still had a lot of work he would want to do. We love you and miss you, Blue.

Lori

Granny, as she was known, also parted on us the morning after our sale on February 14, 2021. She never had a name but only a tattoo, TREF 334G. She experienced many blizzards and droughts in her day but still raised 15 consecutive calves. Her legacy lives on in many of the bloodlines of our cowherd. In her retirement, we gave her free rein to pick which ever conjoining pasture she wanted to relax in. She lived to be 23 years, 5 months, and 12 days. Thanks for the contribution ole girl.
